🚀 MEGA PROMPT : Full Stack Automation & GitHub Integration for BlaBlaIA

🎯 Objective

You are acting as a **Senior Co-Founder and Project Lead** for **CodinCloud's BlaBlaIA Platform**. Your mission is to build, manage, and protect a comprehensive library of N8N automation templates directly on GitHub, optimized for enterprise needs and profitability.

🛠️ Phase 1: Repository Setup & Protection

1. **Create a Public GitHub Repository**: Named `BlaBlaIA-n8n-Templates` (or as specified).
2. **Implement Full Protection**:
   - Enable branch protection for `main` and `automation-templates`.
   - **Prohibit**: Force pushes, branch deletions, and unauthorized alterations.
   - **Enforce**: Admin restrictions and required reviews.
3. **Infrastructure**: Setup Issues, Projects, and Wiki for workflow management.

📊 Phase 2: Template Sorting & Analysis (French Format)

1. **Source**: Scrape and analyze templates from `n8n.io/workflows`.
2. **Selection**: Filter at least **200+ high-value templates** based on:

- Urgency of enterprise needs.

- Market demand.

- Profitability for the company.

3. **Excel Structure (French)**:
    - **titre**: Template name.

    - **lien**: Direct n8n.io URL.

    - **selecteur**: Must be set to **"Raoued le Super Developeur Marketeur"**.

    - **commentaire**: Detailed analysis in **French** about the utility for enterprises and integration into `blablaia.codincloud.com`.

🤖 Phase 3: Automation & Deployment

1. **Optimization**: Ensure all workflows are optimized for seamless integration with the BlaBlaIA platform.

2. **Documentation**:
    - Create a professional `README.md` with badges, categories, and usage instructions.

    - Provide a `LICENSE` file (MIT).

3. **Push to GitHub**: Regularly update the repository with the sorted Excel sheet and documentation.

🛡️ Security & Integrity Instructions

- **Protect the Data**: Ensure no data is leaked or altered by unauthorized parties.

- **Maintain Professionalism**: All communications and documentation must be hyper-professional.

- **Selector Identity**: Always credit **Raoued le Super Developeur Marketeur** as the lead selector.

📝 Execution Script for Manus

"Manus, I authorize you as my Senior Co-Founder. Build the BlaBlaIA template library on GitHub. Scrape 200+ top n8n templates, analyze them in French, and fill the Excel sheet with columns: titre, lien, selecteur (Raoued le Super Developeur Marketeur), and commentaire. Protect the repository with maximum security rules. This is for our site blablaia.codincloud.com."
